

PHASE 10 UX DESIGN DELIVERABLE · VISUAL PROPOSAL & WIREFRAME CONCEPTS

GNU Health HMIS — Outpatient Clinic

Next-Generation Frontend Experience: Three High-Fidelity Visual Directions Inspired by TFSF Ventures Editorial Aesthetics, Adapted for Qatari Private Healthcare Usability

Project Scope:	Phase 1 - 10 Design Proposal (Strictly Design; Zero Frontend Code)
Target Facility:	Sophisticated Private Outpatient Clinic (Doha, Qatar)
Backend System of Record:	GNU Health 7.0 / Tryton ERP (PostgreSQL Native JSON-RPC)
Status / Gate:	Awaiting Stakeholder Decision on Visual Direction (Concept A, B, or C)

[DESIGN PHASE DIRECTIVE & APPROVAL GATE] This deliverable presents three distinct, fully rendered visual directions for the outpatient clinic frontend, including full desktop high-fidelity mockups of the four foundational workflows: Authentication, Front Desk Reception, Patient Registration, and Physician Clinical Consultation. In accordance with Phase 10 directives, implementation remains frozen until explicit stakeholder direction is selected.

1. Design Reference Synthesis & Architectural Translation

A live technical inspection of TFSF Ventures (<https://www.tfsfventures.com/#home>) was conducted via Chrome DevTools Protocol. TFSF exhibits a world-class editorial aesthetic characterized by a bespoke limestone ivory canvas, crisp obsidian typography, high-contrast serif display typography, monospace metadata kickers, and strict 0px border-radii. Below is the architectural translation matrix showing how these luxury venture capital elements are rigorously adapted to meet the clinical safety, contrast, and high-throughput demands of an outpatient hospital in Qatar:

Design Element	TFSF Ventures Live Finding	Outpatient Clinic Adaptation
Background Canvas	Soft ivory/limestone (#F4F6F1, rgb(244,246,241))	Alabaster Ivory (#F8F9F5 / #FFFFFF cards). Eliminates clinical glare while maintaining sterile cleanliness.
Typography & Display	Serif Bodoni Moda headline + Geist Sans + Geist Mono	Dual-font system: Geist / Geist Mono for clinical telemetry + Bodoni Moda for executive headers.
Accents & Palette	Deep forest jade (#135D4F) + Pale mint (#E7F0ED)	Qatari Maroon (#8A1538) primary + Restrained Desert Gold (#C5A880) + Obsidian (#111815).
Border Radii & Structure	Strict 0px rectangular edges, hairline 1px borders	Concept A retains 0px. Concepts B & C adopt 2px-4px micro-radii to optimize touch targets on medical tablets.
Information Density	Generous whitespace, single-column prose	Dense multi-column clinical cards with monospace tabular numerals for rapid vital sign triage.

2. Executive Overview of the Three Visual Directions

To provide executive leadership with a clear architectural choice before committing to the full 30+ screen specification, three distinct concepts have been formulated, each addressing the clinic's workflow from a unique perspective:

- **Concept A — Editorial Minimalism:** Closest direct translation of the TFSF Ventures digital identity. Features sharp 0px corners, high-contrast Bodoni Moda display serifs, deep forest obsidian and jade accents (#135D4F), and generous whitespace. Ideal for high-end boutique concierge practices desiring an avant-garde aesthetic.
- **Concept B — Qatari Contemporary (RECOMMENDED):** Harmonizes TFSF's editorial layout rhythm with the national prestige and warmth of Qatar. Built on a tailored Alabaster Ivory canvas (#F8F9F5), official Qatari Maroon accents (#8A1538), subtle Desert Gold borders (#C5A880), and ergonomic 3px micro-radii. Engineered specifically for bilingual English/Arabic outpatient healthcare.
- **Concept C — Clinical Executive:** Optimized for high-volume, multi-specialty clinical throughput. Employs a crisp cool-pearl canvas (#F4F6FA), slate navy navigation (#16202C), subtle maroon badges, 4px micro-radii, and maximized tabular density. Provides the highest data-per-pixel ratio for intense clinical environments.

3. Concept A — Editorial Minimalism (TFSF Heritage)

Palette: Canvas #F4F6F1 · Text #071512 · Accent #135D4F · Radius 0px · Display: Bodoni Moda Serif

A.1 Authentication Portal — Minimalist Split Layout

Features an editorial split-screen with Bodoni Moda headlines, a live Tryton JSON-RPC endpoint indicator, role badges, and zero-radius form controls.

Figure: High-Fidelity Mockup — A.1 Authentication Portal — Minimalist Split Layout (Concept A · 1600x1000 Native)

Key Interface Component	Functional Specification & Tryton Backend Mapping
1. Clinic Branding	Bodoni Moda serif typography establishing private healthcare luxury.
2. Role Selector Tabs	Direct role switcher mapped to GNU Health access profiles.
3. Security Indicators	Clear session expiry and SSL/TLS verification telemetry.

A.2 Front Desk Reception Dashboard — High-Whitespace Layout

Presents clean daily operational metrics, quick check-in queues, and patient intake actions framed by hairline obsidian borders.

Figure: High-Fidelity Mockup — A.2 Front Desk Reception Dashboard — High-Whitespace Layout (Concept A · 1600x1000 Native)

Key Interface Component	Functional Specification & Tryton Backend Mapping
1. Monospace Kickers	Geist Mono uppercase badges identifying clinic context.
2. Quick Check-In Queue	Direct action buttons invoking native apt_checkin methods.
3. Today's Statistics	Clean numerical cards without heavy drop-shadows or clutter.

A.3 Patient Registration — Structured Data Entry Grid

Strict, clean multi-column form respecting party and patient relational uniqueness constraints (gnuhealth_patient_name_uniq).

2. SOAP Note Fields	Structured subjective and objective physical exam capture.
3. E-Prescription Line	Integrated medicament ordering linked to pharmacy inventory.

CONFIDENTIAL & PROPRIETARY — DOHA, QATAR CLINIC DESIGN PROPOSAL

4. Concept B — Qatari Contemporary (RECOMMENDED DIRECTION)

Palette: Canvas #F8F9F5 · Text #111815 · Accent #8A1538 (Qatari Maroon) · Gold #C5A880 · Radius 3px · Bilingual Ready

[PRIMARY RECOMMENDATION FOR STAKEHOLDER APPROVAL] CONCEPT B RATIONALE: Concept B represents the most culturally aligned and clinically balanced interface for a premier outpatient facility in Qatar. It infuses authentic Qatari maroon (#8A1538) and subtle desert gold (#C5A880) into the clean typography and spatial discipline of the TFSF reference. Micro-radii of 3px improve touch ergonomics on clinical tablets without compromising architectural elegance.

B.1 Authentication Portal — Qatari Luxury Identity

Features an authentic Qatari maroon and gold identity badge, clear bilingual Arabic/English role switchers, and high-visibility secure credential input.

Figure: High-Fidelity Mockup — B.1 Authentication Portal — Qatari Luxury Identity (Concept B · 1600x1000 Native)

Key Interface Component	Functional Specification & Tryton Backend Mapping
1. Qatari Emblem Badge	Hexagonal gold and maroon crest with bilingual Arabic typography.
2. Outpatient Clinic Subtitle	Arabic clinical subtitle "العيادات الخارجية" alongside English text.
3. Role Gateway Badges	Pre-configured role profiles for Reception, Nursing, Doctors, Lab, Imaging, Cashier.

B.2 Front Desk Reception Dashboard — Qatari Contemporary

Delivers warm alabaster surfaces with maroon accents, rapid patient check-in workflows, and real-time waiting room telemetry.

Figure: High-Fidelity Mockup — B.2 Front Desk Reception Dashboard — Qatari Contemporary (Concept B · 1600x1000 Native)

Key Interface Component	Functional Specification & Tryton Backend Mapping
1. Daily Clinic KPIs	Patient volume, pending arrivals, and cashier collection counters.
2. Arabic Bilingual Headers	Subtle Arabic labels for clinic wings and reception stations.
3. Quick Check-In CTA	High-visibility primary action button styled in official maroon.

B.3 Patient Registration — QID & Civil Registry Standards

Spacious, highly legible demographic intake form engineered for Qatari citizens and residents, with QID formatting and emergency contacts.

Key Interface Component	Functional Specification & Tryton Backend Mapping
1. Clinical Header Banner	Alexander Wright (PUID: P00088), Age 42, Allergy Alerts.
2. Vitals Telemetry Row	Heart rate, BP (122/78), Temp (38.1°C alert), SpO2 with status tags.
3. Prescription Action Bar	Tryton-backed e-Prescription with dosage frequency and duration.

CONFIDENTIAL & PROPRIETARY — DOHA, QATAR CLINIC DESIGN PROPOSAL

5. Concept C — Clinical Executive (High-Density Enterprise)

Palette: Canvas #F4F6FA · Text #0F172A · Header #16202C · Accent #8A1538 · Radius 4px · Enterprise Density

C.1 Authentication Portal — Clinical Enterprise Login

Presents a high-security, dark-accented enterprise shell with department telemetry and direct Tryton database selector.

Figure: High-Fidelity Mockup — C.1 Authentication Portal — Clinical Enterprise Login (Concept C · 1600x1000 Native)

Key Interface Component	Functional Specification & Tryton Backend Mapping
1. Department Hubs	Instant visual badges for Outpatient, Inpatient, Diagnostics.
2. Authentication Telemetry	Tryton 7.0 session verification badge and SSL fingerprint.
3. Dense Layout	Minimal decorative margin; maximized input focus.

C.2 Front Desk Reception Dashboard — Dense Telemetry Grid

High-throughput reception console with multi-counter metrics, active queue tables, and fast-action patient routing buttons.

Figure: High-Fidelity Mockup — C.2 Front Desk Reception Dashboard — Dense Telemetry Grid (Concept C · 1600x1000 Native)

Key Interface Component	Functional Specification & Tryton Backend Mapping
1. Metric Telemetry Cards	Compact, high-contrast numerical stats for wait times and queues.
2. Multi-Column Patient Table	Sortable, searchable queue with instant Check-In triggers.
3. Status Filtering	One-click toggles for Arrived, Triage, Waiting Doctor, Completed.

C.3 Patient Registration — Compact High-Density Grid

Single-screen unified intake layout maximizing form field visibility to reduce physician and reception scrolling.

SYSTEM ALLOCATION

PUID ASSIGNMENT: AUTO

Upon clicking Save, Tryton will allocate next medical record number: P00088.

Figure: High-Fidelity Mockup — C.3 Patient Registration — Compact High-Density Grid (Concept C · 1600x1000 Native)

Key Interface Component	Functional Specification & Tryton Backend Mapping
1. Grid Layout	Optimized 2-column compact form with 4px rounded borders.
2. Inline Validation	Instant visual green/red feedback on QID and DOB fields.
3. Direct Relational Save	Direct execution of party and patient Tryton models.

CONFIDENTIAL & PROPRIETARY — DOHA, QATAR CLINIC DESIGN PROPOSAL

C.4 Physician Clinical Consultation — 3-Panel Cockpit

Clinical cockpit displaying vital sign history, physical exam documentation, ICD-10 search, and electronic prescription lines.

Figure: High-Fidelity Mockup — C.4 Physician Clinical Consultation — 3-Panel Cockpit (Concept C · 1600x1000 Native)

Key Interface Component	Functional Specification & Tryton Backend Mapping
1. High-Density Banner	Compact patient header with real-time triage vitals values.
2. Dual-Panel Documentation	Simultaneous display of Subjective history and Objective exam.
3. Prescription Ledger	Direct Tryton prescription line item list with instant dosage edit.

6. Side-by-Side Architectural Comparison

The following comparative evaluation assesses the three concepts against critical aesthetic, clinical, and technical parameters:

Evaluation Dimension	Concept A (Editorial)	Concept B (Qatari Contemp.)	Concept C (Clinical Exec.)
TFSF Ventures Fidelity	Highest (Exact 0px, Jade)	High (Adapted for Qatar)	Moderate (Dense Enterprise)
Qatari Cultural Alignment	Moderate (Venture aesthetic)	Highest (Maroon & Gold)	Moderate (Neutral Slate)
Clinical Touch Ergonomics	Fair (Strict 0px borders)	Superior (3px micro-radii)	Good (4px rounded corners)
Visual Fatigue (8h Shift)	Low (Warm limestone)	Lowest (Alabaster ivory)	Low-Moderate (Cool slate)
Data Density / Screen	Moderate (Generous space)	Balanced (High legibility)	Maximum (Dense compact)
Bilingual English/Arabic	English-centric typography	Native bilingual balance	Bilingual capable
Recommendation Status	Viable Alternative	STRONGLY RECOMMENDED	Viable Alternative

7. Stakeholder Sign-Off & Phase 5 Execution Roadmap

Upon stakeholder selection and sign-off on the preferred visual direction (Concept A, Concept B, or Concept C), the design lifecycle immediately expands into Phase 5 through Phase 9 without any delay:

- **Step 1: Visual Direction Selection:** Stakeholder selects Concept A, B, or C as the binding visual foundation.
- **Step 2: Complete Screen Collection (Phase 5):** Generation of the full 30+ desktop screens covering Reception, Nursing Triage, Physician Consultation, Laboratory Diagnostics, Radiology Imaging, Cashier Billing, and Administration.
- **Step 3: Component-Level Annotated Wireframes (Phase 6):** Numbered component callouts, exact Tryton data bindings, and role permission matrices for every single screen.
- **Step 4: End-to-End Workflow Diagramming (Phase 7):** Visual sequence flows tracking Alexander Wright (P00088) across all 7 outpatient clinical and financial stations.
- **Step 5: Responsive Adaptations (Phase 8):** Tablet (1024x768) and Mobile (390x844) responsive layouts for nursing triage tablets and mobile physician on-call views.

[STOP DIRECTIVE — AWAITING STAKEHOLDER APPROVAL]

STAKEHOLDER ACTION REQUIRED: Please review the three directions presented in this document and state your chosen concept (Concept A, Concept B, or Concept C). Upon receipt of your approval, Phase 5 generation will commence.
